## Limited Warranty and Health Guarantee

At the time of delivery Sassicat Aviary (SELLER) guarantees that, to the best of our knowledge, the bird listed below is in good health and has been well cared for.

SELLER will guarantee the health of the bird listed below as long as the terms of this contract are met in full. A qualified avian veterinarian must see the baby within seven (7) days of delivery. If, during this seven (7) day period, the bird is found to have a condition which affects it's health or well-being as determined by the examining veterinarian, and determined to be directly relatable to the SELLER'S care and husbandry practices, documentation should be sent to the SELLER. Upon return of the bird to the SELLER, the SELLER will, at his/her sole discretion, either refund the entire purchase price or supply another bird of same value. Only the purchase price is refundable, there will be no refund for - DNA sexing expenses, food purchased, shipping expenses, or other products or services provided by the SELLER to the BUYER. SELLER will not be responsible for veterinarian fees. SELLER only guarantees a refund or replacement if the baby is found to be in ill health. SELLER is not responsible and does not guarantee such things as internal organ dysfunction, minor cough or cold, genetic disorders, or minor illnesses due to stress from changing homes.

Even though there are other birds in the home, and even though SELLER is confident this baby is healthy - BUYER must quarantine this baby for a minimum of 30 days from other birds. This guarantee is void if there are other birds in the home and proper quarantine and sanitation practices are not carried out.

All sales are final and no refunds will be given. This warranty will be void after the termination date of the guarantee. This guarantee will be void if the prescribed diet care as outlined below are not followed and/or a vet examination is not performed within 7 days of purchase. The SELLER does not assume any responsibilities for this pet after leaving the premises for veterinarian or medical expense, landlords disapproval, allergy to animals, disagreement of family, behavioral situations, or for any other reason. It is further understood and agreed that no warranty or representation has been made with respect to the bird purchased except as set forth in writing in this agreement.

BUYER will continue to feed the baby Hagen Tropicana Pellets, fresh water, and fresh fruits and vegetables. Do not try to change this babies diet until after the baby has received a clean bill of health from a qualified avian veterinarian. Birds have a very high metabolic rate and therefore an ample supply of pellets and water must be available at all times. Make sure the bird has good ventilation, but keep out of any drafts. Weigh bird daily to monitor if it is eating properly. Transfer from a new home is very stressful for a baby and they sometimes regress a bit. If you notice that your baby is not eating well, losing weight, or whining - offer it some crushed pellets softened with warm water either in a small dish or with a spoon or your fingers.
